Clientele

Uttar Pradesh Metro Rail Corporation Limited

Book Management System

Welcome to our cutting-edge Book Search Engine, your ultimate gateway to discovering the world of literature. Whether you're an avid reader, a curious learner, or a researcher on a quest for specific information, our platform is designed to connect you with the books you need.

Implementation

The URL `https://www.googleapis.com/books/v1/volumes?q=${searchTerm}` is part of the Google Books API. This specific endpoint is used to search for books based on a query parameter, `${searchTerm}`, which you would replace with your actual search term.

Feature Details

Key Features		
#	Basis	Description
